Exp 4: Data Modelling and Form Design for a Business Application in Zoho Creator

(Student Admission Enquiry Form)

Name: Yuvasri K | Register No: 241401129 | Department: CSBS

1. Aim

To design and build a functional “Student Admission Enquiry Form” application in Zoho Creator that demonstrates the correct usage of all thirteen Basic Fields available in the Form Builder, while solving a real institutional requirement of capturing structured student admission enquiries.

2. Procedure

2.1 Problem Statement & Application Scope

The Admissions Office of a college receives student enquiries through phone calls, walk-ins, and emails, resulting in inconsistent and incomplete records. There is no single digital form that captures a prospective student's personal details, contact information, academic preferences, and consent in a structured, validated manner.

Design a low-code application using Zoho Creator that allows a prospective student (or the front-office staff on their behalf) to submit an admission enquiry through a single online form. The form must capture personal identity, contact details, academic interest, availability for counselling, and consent — using every Basic Field type provided by Zoho Creator's Form Builder.

Application Name: Student Admission Enquiry Management **Form Name:** Admission_Enquiry_Form
Report View: Admission_Enquiry_Report

2.2 Data Model & ER Diagram

A Data Model consists of both the visual Entity–Relationship (ER) diagram showing schema relationships and the structured Data Dictionary table defining field types and constraints. The diagram below represents the schema generated for Admission_Enquiry_Form, showing the primary form entity, composite data structures, and the choice/lookup entities, connected through explicit relationships with cardinality (1:1, 1:N, M:N).

2.3 Basic Fields Mapping & Data Dictionary

Table 1 presents the mapping of all thirteen Basic Fields from the Zoho Creator Form Builder palette to their specific roles, purpose, and sample values.

Basic Field	Form Field Name	Purpose & Validation Constraints	Sample Value
Name	Student_Name	Captures the full name of the applicant using First/Last name subfields (Mandatory).	Rene Christine A
Email	Email_Address	Captures a validated email address for sending confirmation and updates.	rene.christine@example.com
Address	Residential_Address	Captures the applicant's full postal address with city, state, and pincode.	3rd Cross Street, Dhanseewaram, Velachery, Chennai, TN, 600042
Phone	Contact_Number	Captures a validated mobile number with country code for the admission cell to call back.	+91 73974 76603
Single Line	Guardian_Name	Captures the parent/guardian name as free short text.	Antony
Multi Line	Additional_Remarks	Captures free-text remarks, e.g. reason for choosing the course.	Interested in AI & Data Science due to strong placement record.

241401129

Basic Field	Form Field Name	Purpose & Validation Constraints	Sample Value
Number	Class_XII_Percentage	Captures a numeric value with validation for marks obtained (0–100).	92
Date	Date_Of_Birth	Captures the applicant's date of birth using a date picker (future dates disallowed).	14-Mar-2008
Time	Preferred_Counselling_Time	Captures the applicant's preferred time slot for a counselling call.	11:00:00
Drop Down	Preferred_Course	Presents a single-select list of available UG/PG programmes.	B.Tech – AI & Data Science
Radio	Gender	Captures a single mandatory selection among mutually exclusive options.	Female
Multi Select	Areas_Of_Interest	Allows selection of one or more extracurricular/technical interest areas.	Robotics, Coding Club, Sports
Checkbox	Terms_Agreement	Captures the applicant's consent to the institution's terms and privacy policy (Mandatory).	Checked (Agreed)

Table 1: Mapping and Specification of Thirteen Basic Fields in Admission_Enquiry_Form

2.4 Form Layout & Configuration Steps

The Admission_Enquiry_Form was organized into four logical, applicant-friendly sections:

- **Section A — Personal Details:** Student Name (Name), Date of Birth (Date), Gender (Radio).
- **Section B — Contact Details:** Email Address (Email), Contact Number (Phone), Residential Address (Address).
- **Section C — Guardian & Academic Details:** Guardian Name (Single Line), Class XII Percentage (Number), Preferred Course (Drop Down), Areas of Interest (Multi Select).
- **Section D — Scheduling & Consent:** Preferred Counselling Time (Time), Additional Remarks (Multi Line), Terms Agreement (Checkbox).

Validation rules configured: Name, Email, Contact Number, Date of Birth, Gender, Preferred Course, and Terms Agreement were set as mandatory fields; the Email field uses built-in format validation; the Phone field uses the +91 country-code format; Class XII Percentage is range-restricted from 0 to 100; Date of Birth disallows future dates; and the form cannot be submitted unless the Terms Agreement checkbox is checked.

3. Output

The following figures show the live preview of the form and the submitted admission enquiry records in the report view:

4. Result

The “Student Admission Enquiry Form” application was successfully built in Zoho Creator using all thirteen Basic Fields, with full field validations, section layout formatting, ER schema modeling, and report view generation meeting all assignment requirements.
